About

Volcanomobile cannot be held responsible for any kind of dysfunction. Drum Sequencer is not a professional app. Drum Sequencer was created for fun and because there was no other application filling our needs on the Android market.

You can contact Volcanomobile at contact@volcanomobile.net

You can find Volcano Mobile on Google Play page <https://play.google.com/store/apps/developer?id=Volcano%20Mobile>

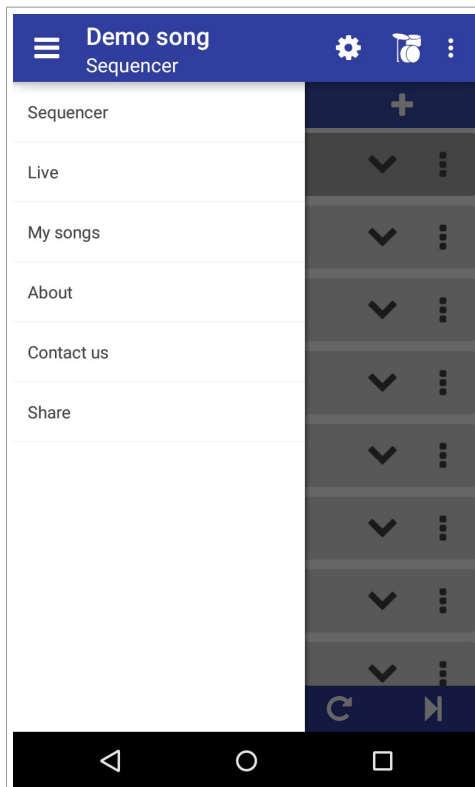

Player control

    	 Previous sequence
	 Play/Stop
	 Pause/unpause
	 Loop at end of song
	 Next sequence

Left Menu

Slide from the left of the screen or clicking on the button  will open the left menu.

Buttons

- Sequencer: Create your song
- Live: switch sequences in live
- My songs: your saved songs
- About: about Drum Sequencer
- Contact us: send us an mail
- Share: share Drum Sequencer with friends

Application screens

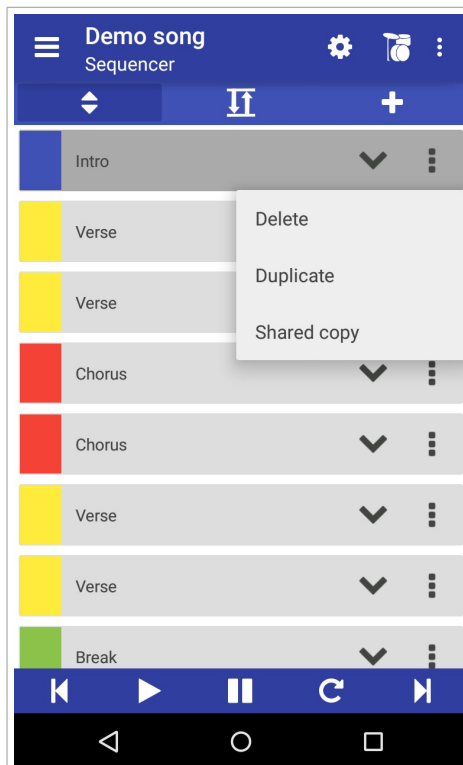

- **Sequencer**
 - Song settings
 - **Drumset**
 - Load drumset
 - **Sequence**
 - Sequence options
 - *Drumset*
 - Drumpads
 - Sequence volumes
- Live
- My files
- About

Drumset screen is accessible via Sequencer and Sequence screens.

Sequencer

Sequencer main screen

Buttons

-  Song settings
-  Drumset
-  **Options menu** (if not visible, use option menu of your device)
 - New song
 - Save
-  Set loop start/end sequencer
-  Add new sequence

Sequences list

- Colored square: position player to sequence
- Sequence name: go to sequence.
-  Select sequence
-  **Sequence options**
 - Delete: delete the sequence
 - Duplicate: duplicate the sequence
 - Shared copy: create a shared copy

Settings

- Artist name
- Song title
- **Tempo**
 -  Decrease tempo (long press to decrease 10)
 - Edit tempo
 -  Increase tempo (long press to increase 10)
 - Tap tempo
- **Beats settings**
 - Number of beats for each bar
 - Precision: number of “pads” for each beat

Drumset

Drumset of the song

Buttons

 Load drumset

Drums list

For each drum, a button with drum name and sample assigned.

Click on a drum button to show its settings

Drum settings

- **Sound**
 -  Previous sample
 - Sequence name, open samples select
 -  Next sample
- **Volume**
 - Minimum volume
 - Maximum volume
- **Rate**
 -  Decrease minimum rate
 -  Increase minimum rate

Only samples according to selected drum are assignable.

If minimum volume and maximum volume are different, a random value between both will be applied each time this sample is played. Same for the rate.

Rate will slow down or speed up sample but also pitch it.

Load drumset

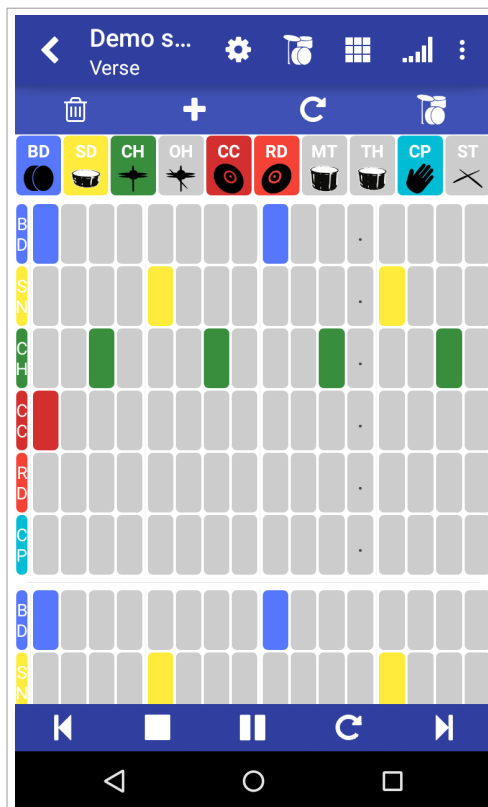

The image shows a mobile application interface. At the top, there is a dark blue header bar with a white back arrow icon on the left, followed by the text "Demo song" in white, and "Drumset" in a smaller white font below it. Below the header, there are four light gray rectangular buttons stacked vertically, each containing black text: "Punk", "Metal", "Hip-Hop", and "Jazz". The "Jazz" button is highlighted with a darker gray background. At the bottom of the screen, there is a dark blue playback control bar with white icons for previous, stop, play/pause, repeat, and next. Below this bar is a black Android navigation bar with white icons for back, home, and recent apps.

Last loaded drumset is highlighted independently of any changed made on drumset settings after it was loaded.

Sequence

The sequencer show the list of bars

Buttons

- Sequence options
- Drumset
- Drumpads
- Sequence volume
- **Options menu** (if not visible, use option menu of your device)
 - Save
- Delete last bar
- Add bar at end
- Enable/disable loop on sequence
- Show/hide select sequence drums

Select sequence drums

You can choose which sample will be displayed. Clicking on one of the drum icons will display/hide drum line in this screen.

Bars list

Each bar has a line for each visible drum and each line has many pads than defined in song/sequence signature.

Tap on pads to enable/disable drum.

There is a little white space between each beats.

Sequence options

Sequence options

Sequence name

Verse

Beats settings

Number of beats

Herit (4)

Precision

Herit (4)

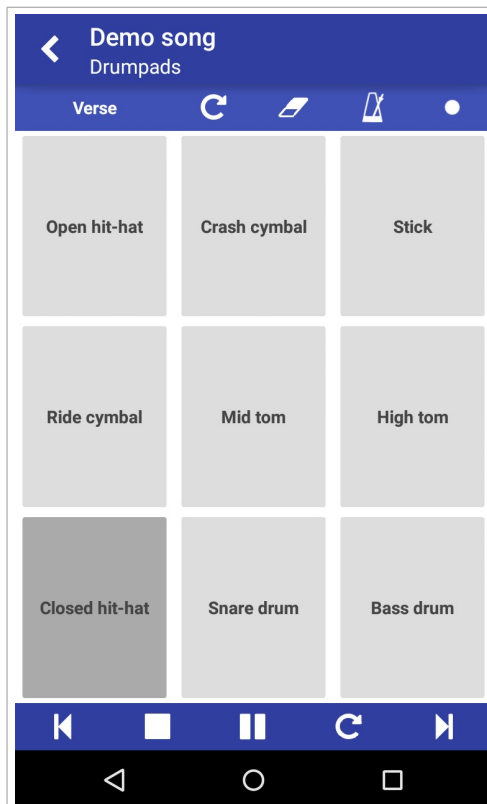

Options

- Sequence name
- **Beats settings**
 - Number of beats for each bar
 - Precision: number of “pads” for each beat

By default, Number of beats and Precision are inherited from song

Drumpads

Buttons

- Sequence name: go back to sequence
-  Enable/disable loop sequence
-  Erase:
-  Enable/disable metronome
-  Enable/disable recording

Erase

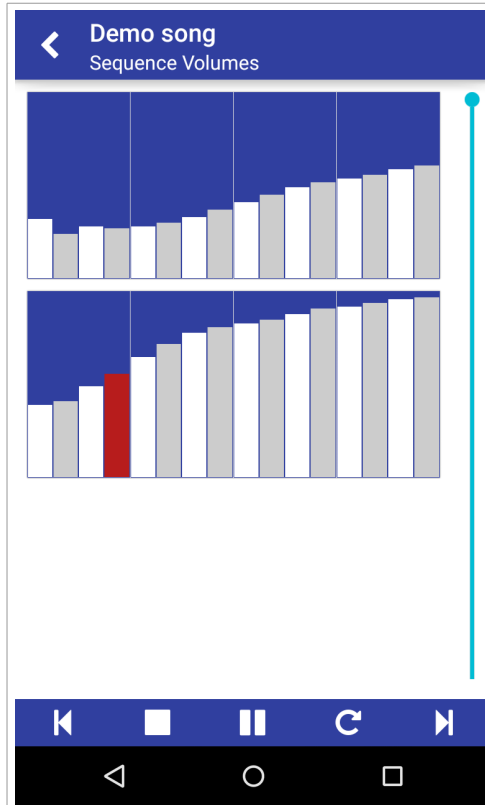

- When activated, clicking on a drum pad will erase selected drum sample in sequence.
- Long press will erase all samples in sequence

Pads

Touch a pad will play the drum sample and record it if recording is activated.

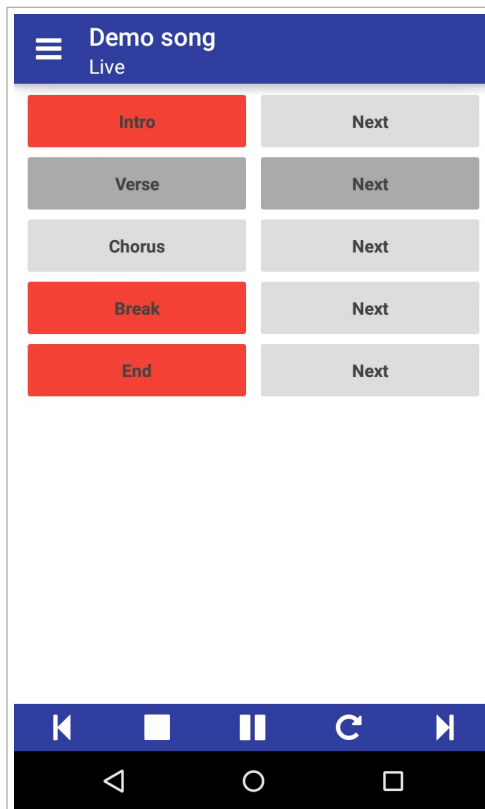

Sequence volume

Sliders for each “pads” of each measure.

Live

There is 2 buttons for each sequence

Buttons

- Sequence name: will play the sequence directly
- Next: sequence will be played at end of the current playing sequence.

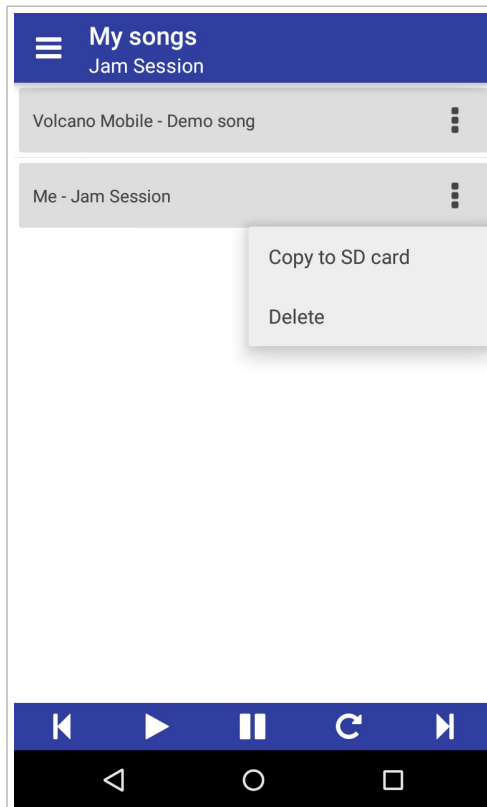

Playing a sequence directly will not be played from the beginning, it will start at the current position. You can basically click at any time on this button and it will be ok.

With sequence having different time signature, the current position on one of these sequences will be at an undesired position when switching on the second one. That's why buttons of sequences having a different time signature than the current playing sequence are in red. Next buttons are never red because they will start when the current one is ended, so no time-signature problem.

My songs

Here you can find songs you saved

Songs list

- Song name: will load the song
-  Song menu
 - Copy on SD card: will copy the file in the “drum-sequencer” folder on your SD card
 - Delete: delete the song
