## About

Volcanomobile cannot be held responsible for any kind of dysfunction. Drum Sequencer is not a professional app. Drum Sequencer was created for fun and because there was no other application filling our needs on the Android market.

You can contact Volcanomobile at [contact@volcanomobile.net](mailto:contact@volcanomobile.net)

You can find Volcano Mobile on Google Play page <https://play.google.com/store/apps/developer?id=Volcano%20Mobile>

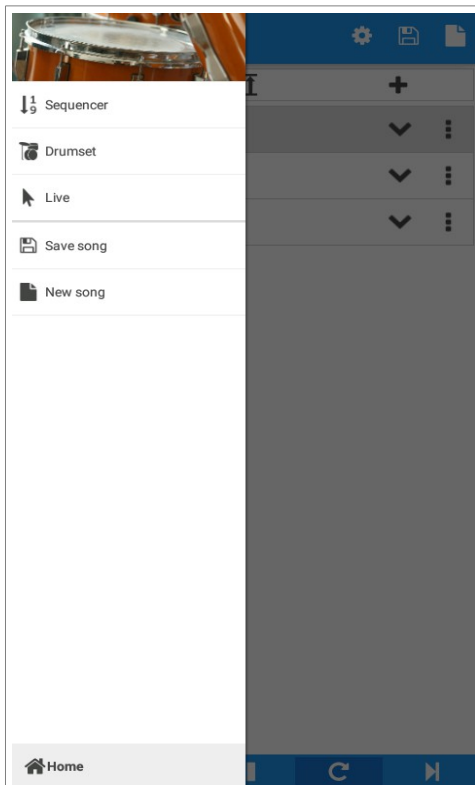

## Player control

	 Previous sequence
	 Play/Stop
	 Pause/unpause
	 Loop at end of song
	 Next sequence

## Left Menu

Available in the sequencer screens, clicking on the button  or slide from the left of the screen will open the left menu.

 Sequencer: create your song sequences

 Drumset: customize your song drumset

 Live: switch sequences in live

 Save song: save current song

 New song: create a new song

 Home: go back to home screen

# Application main screens

## Home screen

- Sequencer

- Help/About

## Sequencer

- Main screen
  - Sequence
    - Drumpads
    - Sequence volumes
- Drumset
- Live

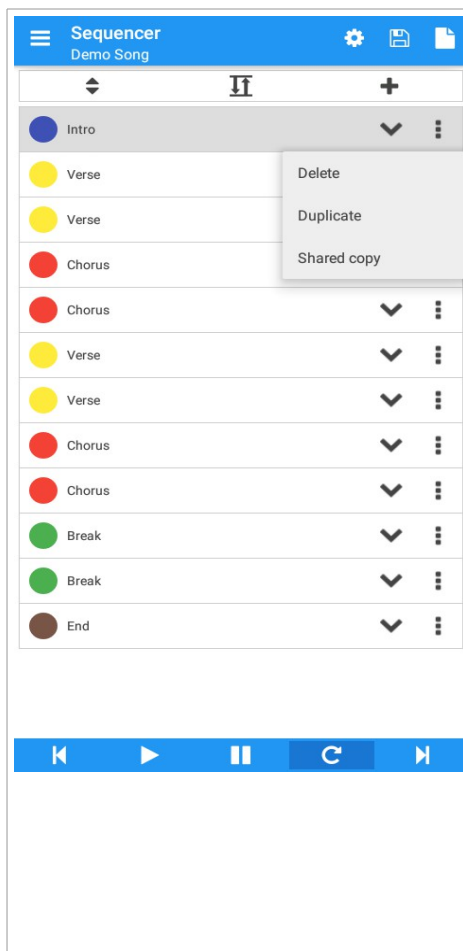

## Home screen

A screenshot of the 'Drum sequencer' app's home screen. The title bar is blue with the text 'Drum sequencer' and icons for email and sharing. Below the title bar are two buttons: 'New song' (green) and 'My songs' (brown). The main area is a large red rectangle labeled 'Sequencer' with a 'Demo Song' label in the bottom right. Below the red area is a teal rectangle labeled 'Preferences' with a gear icon. At the bottom is an orange rectangle labeled 'Help / About' with an information icon. A small image of a drum is visible on the left side of the teal area.	<ul style="list-style-type: none"><li> Contact us</li><li> Share application</li><li> New song: create a new song</li><li> My song: songs you saved</li><li> Sequencer: open sequencer with last song edited</li><li> Preferences</li><li> Help/About</li></ul>

# Sequencer

## Sequencer main screen

### Buttons

-  Song settings
-  Auto scroll: auto scroll to playing sequence
-  Set loop start/end sequencer
-  Add new sequence

### Sequences list

- Colored circle: position player to sequence
- Sequence name: go to sequence.
-  Select sequence
-  **Sequence options**
  - Delete: delete the sequence
  - Duplicate: duplicate the sequence
  - Shared copy: create a shared copy

## Song settings

## Settings

- Artist name
- Song title
- **Tempo**
  -  Decrease tempo (long press to decrease 10)
  - Edit tempo
  -  Increase tempo (long press to increase 10)
  - Tap tempo
- **Beats settings**
  - Number of beats for each bar
  - Precision: number of “pads” for each beat

## Drumset

Drumset of the song

### Buttons

Load drumkit

### Drums list

For each drum, a button with drum name and sample assigned.

Click on a drum button to show its settings

### Drum settings

- **Sound**
  - ◀ Previous sample
  - Sequence name, open samples select
  - ▶ Next sample
- **Volume**
  - Minimum volume
  - Maximum volume
- **Rate**
  - ◀ Decrease rate
  - ▶ Increase rate
  - Slider to set rate easily

Only samples according to selected drum are assignable.

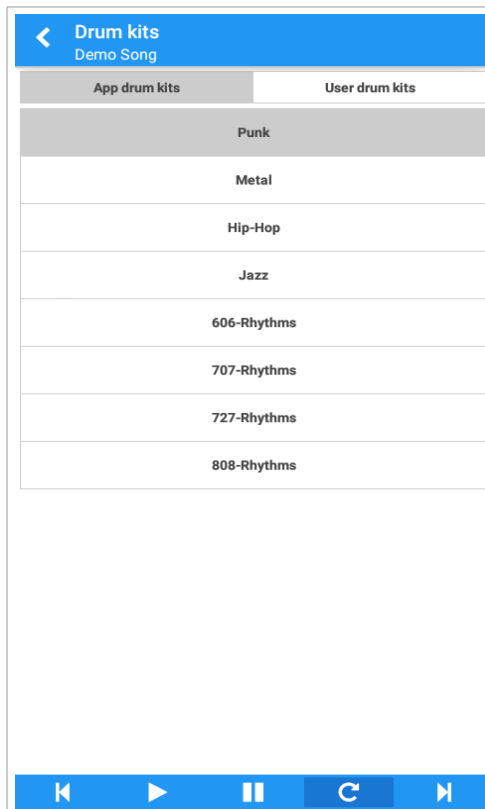

If minimum volume and maximum volume are different, a random value between both will be applied each time this sample is played. Same for the rate.

Rate will slow down or speed up sample but also pitch it.

## Drum kits

Switch between app drumkits and user drumkits

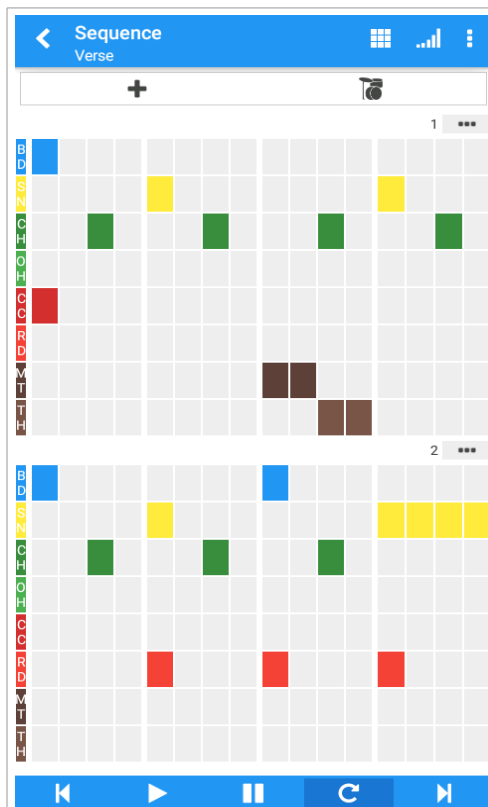

Click on a button to load complete drum kit

Last loaded drumset is highlighted independently of any changed made on drumset settings after it was loaded.

## Sequence

The sequencer show the list of bars

### Buttons

-  Sequence options
-  Drumpads
-  Sequence volume
-  Save (in option menu )
-  Add bar at end
-  Enable/disable loop on sequence (only if auto loop mode is unset in preferences screen)
-  Show/hide select sequence drums dialog

### Select sequence drums dialog

You can choose which sample will be displayed. Clicking on one of the drum icons will display/hide drum line in this screen.

### Bars list

Each bar has a line for each visible drum and each line has many pads than defined in song/sequence signature.

Tap on pads to enable/disable drum.

There is a little white space between each beats.

## Sequence settings

[illegible]

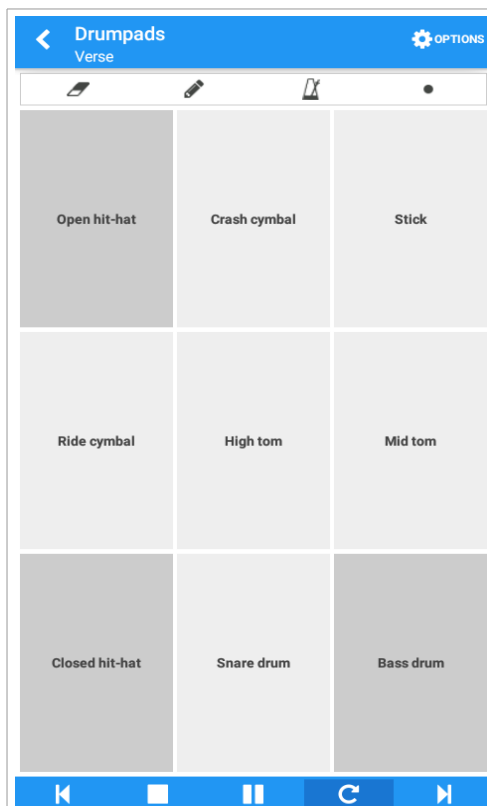

## Options

- Sequence name
- Sequence color
- **Beats settings**
  - Number of beats for each bar
  - Precision: number of “pads” for each beat

By default, Number of beats and Precision are inherited from song

## Drumpads

### Buttons

-  Drumpads options: open drumads options screen. You can change number of pads displayed
- Sequence name: go back to sequence
-  Enable/disable loop sequence
-  Erase mode: more explanation below
-  Edit mode: when activated, hit a pad will open the pad options screen.
-  Enable/disable metronome
-  Enable/disable recording

### Erase

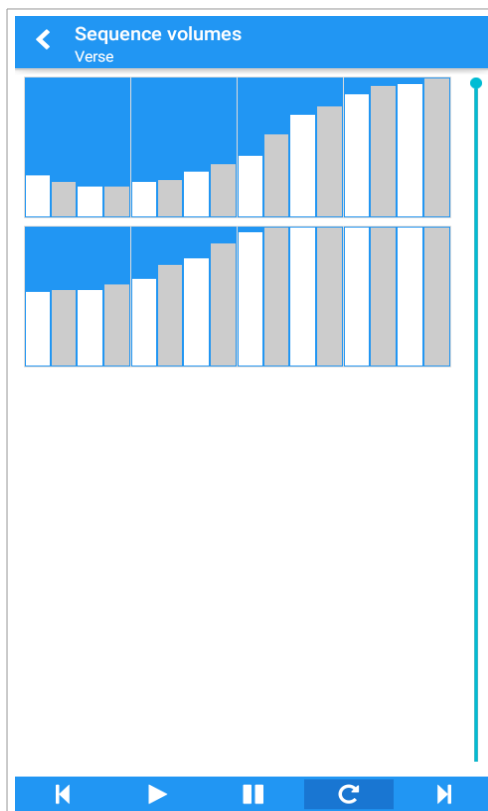

- When activated, clicking on a drum pad will erase seleted drum sample in sequence.
- Long press will erase all samples in sequence

### Pads

Touch a pad will play the drum sample and record it if recording is activated.

## Sequence volumes

Sliders for each “pads” of each measure.

## Live

Switch between sequences while playing.

Live Demo Song	
Intro	Next
Verse	Next
Chorus	Next
Break	Next
End	Next

There is 2 buttons for each sequence

### Buttons

- Sequence name: will play the sequence directly
- Next: sequence will be played at end of the current playing sequence.

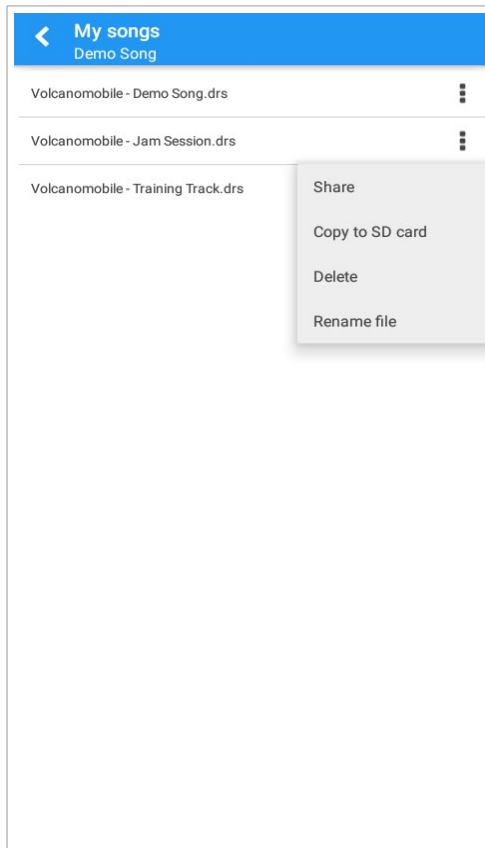

Next sequence to play is displayed in yellow.

Buttons of sequences having a different time signature than the current playing sequence are in red. With sequence having different time signature, the current position on one of this sequence will be at a undesired position when switching on the second one. Next button are never red because it will start when the current one is ended, so no time-signature problem.

## My songs

Here you can find songs you saved

### Songs list

- Song name: click on a songname will load the song
-  Song menu
  - Share: allow you to share the song file
  - Copy on SD card: will copy the file in the “drum-sequencer” folder on your SD card
  - Delete: delete the song
  - Rename file: allow you to rename the file
